# Important Packaging Notice

## **Cholestech LDX<sup>®</sup> Product Line Packaging Rebranding to Alere**

---

Dear Valued Distribution Partners,

Cholestech LDX<sup>®</sup> product lines are in the process of rebranding from Cholestech to Alere. This change reflects our commitment to simplifying and uniting our various brands under the new Alere name. This is strictly a graphic change; there are no changes to the product's functionality or test procedures. Our customers will continue receiving the same high quality results they have always had, but now with a fresh new look.

### **We Asked Our Customers**

We spoke with our Cholestech LDX<sup>®</sup> System users to gather feedback on the packaging changes. We used their feedback to make improvements and ensure a smooth transition to the Alere brand.

### **Timeline**

Rebranded products will begin shipping in July 2011. Each rebranded product will begin shipping after all existing product stock is exhausted, so you may start receiving rebranded product later than July. The rebranding will be reflected in both the meter and reagent packaging.

### **Product Compatibility**

During the transition period, your customers may receive a combination of previous and new designs. Because this is only a graphic change to the packaging, they may use the products interchangeably. For example, the new Alere-branded test devices and cassettes will work with previous meters and analyzers.

### **Kit Stuffer**

Alere anticipates that some customers may have questions, so a Kit Stuffer will be included in all rebranded meter/analyzer and reagent boxes informing customers of the new look.

### **Your Next Steps**

Notify any individuals in your organization that routinely handle Cholestech LDX<sup>®</sup> products of these changes by providing this notice to them.

The following pages summarize the rebranding changes in greater detail.

# Cholestech LDX<sup>®</sup> Packaging Design Changes

## Analyzer and Shipper Box

The Cholestech LDX<sup>®</sup> Logo has been updated with an Alere logo. The product is now called the "Alere Cholestech LDX<sup>®</sup> Analyzer".

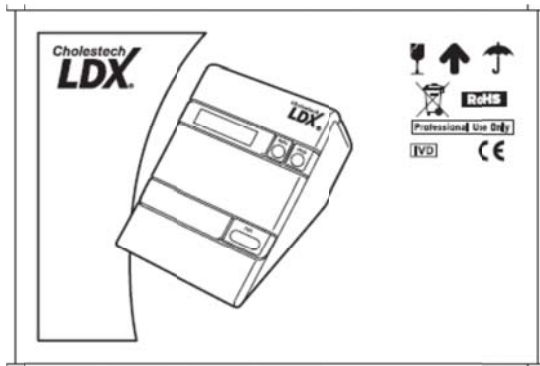

**Previous**

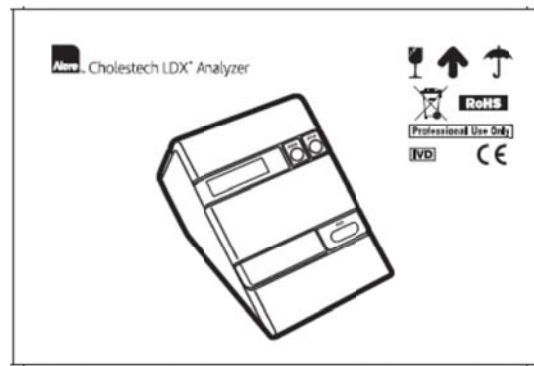

**New**

**Previous Shipper Box**

**New Shipper Box**

## Printer

The printer has a new low profile design and has been updated with an Alere logo. Both printers use the same paper roll and can be used with both the previous and new Analyzers.

**Previous**

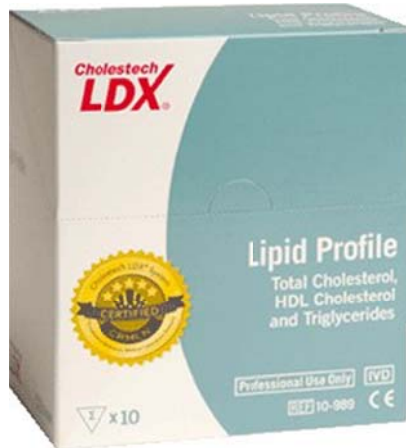

**New**

## Cassette Boxes and Foils

The test cassettes themselves are unchanged, but the boxes and foils have been updated. All the instructional symbols for expiration, storage, contents, etc have been grouped together on a side panel for easier viewing.

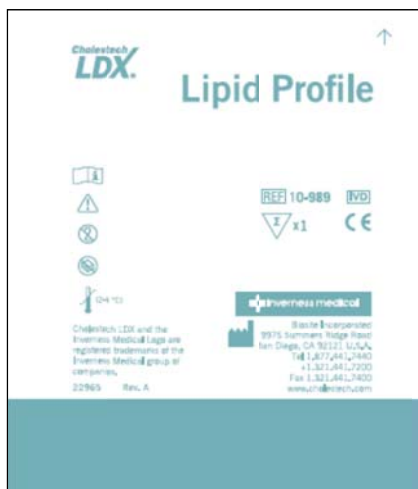

**Previous Box**

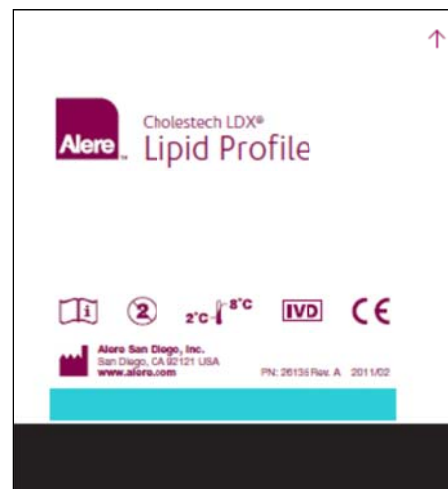

**New Box**

**Previous Foil**

**New Foil**
